Application/Control Number: 10/748,232

Art Unit: 2876

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/13/06 has been entered.

Page 2

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 4. Claims 13-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Connolly et al US 2002/0017567A1 in view of Wenner et al US 6,225,141B1 and Reddersen et al US 2004/0065741A1. As seen in the previous Office Action, Connelly discloses a bar code reader that includes a decoder 7a [0078]. The decoded

Application/Control Number: 10/748,232

Art Unit: 2876

information emanating from the decoder 7a is passed by wireless link from the radio 7b (RF communication means) to a second peripheral module... [0079]. At the second peripheral module, the signal is digitized and processed by processing circuitry 9c [0080]. There is also disclosed a memory device 9h and a touch screen keypad 9f [0080]. It is disclosed that the bar code is read by means of a raster scanner [0161], i.e. a position shifting irradiation laser beam. Connolly does not disclose the bar code label on the individual circuit boards within the bar code reader. Also as seen in the previous Office Action, Wenner discloses in column 3 line 25 that a label containing a unique bar code is applied to individual circuit boards. It would have been obvious to a person of ordinary skill in the art at the time of the invention to label the internal circuit boards of Connolly as taught by Wenner. Also as taught by Wenner in column 3 line 26-27 this would facilitate identification of the circuit boards during manufacturing. Connolly and Wenner as combined do not disclose the dedicated reader management storage unit as now specifically claimed. The newly applied reference to Reddersen discloses reading a bar code label which is read to configure the reading system. The data read from the bar code is stored in a non-volatile memory. [0052]. It would have been obvious to a person of ordinary skill in the art at the time of the invention to store configuration data in a dedicated memory as taught by Reddersen, in the system of Connolly/Wenner. This would help to ensure that the configuration data and operating program/system was not accidentally corrupted.

Page 3

5. Claims 1-12 are allowable over the prior art of record.

Application/Control Number: 10/748,232

Art Unit: 2876

6. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to teach or fairly suggest to one of ordinary skill in the art at the time of the invention storing the bar code contents only if the contents is management information as now specifically claimed in claim 1.

Page 4

- 7. It is noted that no amendment to or arguments against the rejection of claim 13 have been filed.
- 8. This is a RCE of applicant's earlier Application No. 10/748,232. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl D. Frech whose telephone number is (571) 272-2390. The examiner can normally be reached on maxi-flex.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G. Lee can be reached on (571) 272-2398. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
